

CONRAD TOKE

Houston, TX | 346-946-9938 | conradtoke24@gmail.com

SUMMARY

Data operations specialist experienced in cleaning, validating, and transforming high-volume datasets using Python, SQL, pandas, and NumPy. Skilled in building automated analysis pipelines on AWS and performing exploratory data analysis to identify trends and data quality issues, delivering 100% accurate reporting for critical election workflows. Strong communicator adept at summarizing findings for diverse audiences, seeking a Data Science Intern role to turn complex data into actionable insights.

EDUCATION

Houston Christian University

MS, Data Science

Aug 2025 - Dec 2026

University of Buea

BSc, Management

2013 - 2016

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate: 2023**

TECHNICAL SKILLS

- **Languages:** Python, SQL, R
- **ML & Data:** Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, PySpark, NLTK, Data Quality, Exploratory Data Analysis, Statistical Techniques
- **AWS Cloud:** EC2, S3, Lambda, IAM, VPC, RDS, DynamoDB, Redshift, Glue, Kinesis, EMR, Step Functions, CloudWatch, CloudTrail, SQS, SNS, API Gateway
- **DevOps / IaC & Collaboration:** Terraform, Git, Collaborative Approach To Problem Solving
- **BI & Analytics:** Excel, Power BI

SELECTED PROJECTS

Patient Outcomes Classification

- Engineered patient outcomes dataset in Python (pandas) to improve model stability and reduce missing-value noise by 18%
- Performed exploratory data analysis using pandas, Matplotlib, and Seaborn to identify length-of-stay and post-surgical trends for feature selection
- Trained and benchmarked Logistic Regression, Decision Tree, and Random Forest classifiers to predict overstays and adverse surgical outcomes.

Car Reliability & Safety Analysis

- Cleaned and normalized a multi-year vehicle dataset using SQL and pandas to enable analysis of part reliability and breakdown frequency
- Visualized pricing, failure, and safety patterns across vehicle age cohorts using Matplotlib and Seaborn.
- Developed and evaluated scikit-learn classification models applying statistical techniques to assess whether newer vehicles have lower fatality rates, delivering statistically supported insights

Real-Time Traffic Prediction Pipeline

- Deployed a Spark cluster ingesting live Austin traffic data through a streaming pipeline.
- Productionized a trained ML model to generate real time traffic predictions for downstream consumers.
- Engineered features and models with PySpark (VectorAssembler, StringIndexer, RandomForestRegressor).

AWS Mini-Architecture

- Architected a cloud environment using S3, EC2, and IAM for storage, compute, and secure access control.
- Codified the full stack in Terraform for reproducible, automated provisioning.
- Promoted the architecture across test and production, validating configuration parity and data flow.

EXPERIENCE

Harris County Elections

Data Operations Specialist

Sep 2024 - Aug 2025

Houston, TX

- Executed high-volume data validation workflows ensuring data quality and 100% accuracy across critical election cycles.
- Resolved voter and poll worker inquiries by phone and email, leveraging exploratory data analysis to identify patterns in reported issues and reducing escalations to senior staff.
- Applied statistical techniques for discrepancy resolution, compliance checks, and audit-ready reporting supporting county-wide election integrity.
- Supported training and real time troubleshooting during election day operations, ensuring smooth system performance under peak load.

- Maintained detailed documentation of data corrections, workflow steps, and system issues in Git to support transparency and post-election audits.
- Collaborated with cross functional teams using a collaborative approach to problem solving to streamline data intake processes and reduce manual correction time.

Allied Universal Security

Apr 2022 - Apr 2023

Security Officer & Front Desk Support

Houston, TX

- Administered access logs, visitor data, and building records for 200+ employees, ensuring accurate and compliant documentation.
- Monitored digital security systems and coordinated incident reporting with management for compliance and risk mitigation.
- Authored detailed incident and activity reports used for internal audits and safety reviews.
- Provided front desk support, resolving visitor and employee inquiries while maintaining secure facility operations.
- Recognized as Best Employee of the Year, 2022 for reliability, professionalism, and consistent operational accuracy.

CSAT Solutions

Aug 2021 - Feb 2022

Apple Repair Specialist

Houston, TX

- Diagnosed and repaired Apple laptops and desktops, including hardware replacements, OS reinstalls, and system resets.
- Managed parts inventory and documented repair workflows to maintain audit-ready records and reduce processing errors.
- Performed quality checks to ensure repaired devices met Apple performance standards before release.
- Collaborated with technicians to troubleshoot complex hardware issues and reduce repeat repair rates.
- Recognized as Best Coordinator of the Year, 2021 for accuracy, speed, and customer-ready documentation.
