EDUCATION

MS, Data Science

Houston Christian University
Aug 2025 – Dec 2026

BSc, Management

University of Buea
2013 – 2016

CERTIFICATIONS

AWS Certified Solutions
Architect – Associate
2023

TECHNICAL SKILLS

Languages

Python, SQL, R

ML & Data

Pandas, NumPy, scikit-learn, Matplotlib,
Seaborn, PySpark (SQL/ML), NLTK

AWS Cloud

EC2, S3, Lambda, IAM, VPC, RDS,
DynamoDB, Redshift, Glue, Kinesis, EMR,
Step Functions, CloudWatch, CloudTrail,
SQS, SNS, API Gateway

DevOps / IaC

Terraform

BI & Analytics

Excel (PivotTables, VLOOKUP), Power BI

STRENGTHS

- Analytical thinking
- Attention to detail
- Communication & teamwork

CONRAD TOKE

Data Scientist • Analyst • Machine Learning & Cloud Data Engineer

SUMMARY

Combining experience across data science, analytics, and machine learning/cloud data engineering to build end to end data pipelines, a cloud native workflow, and analytics solutions. Skilled in Python, PySpark, and AWS, I deliver high-accuracy data operations and turn messy, high-volume datasets into clear, decision ready insights.

SELECTED PROJECTS

Patient Outcomes Classification — Python, scikit-learn

- Engineered a patient outcomes dataset by improving model stability and reducing missing value noise by 18%.
- Ran EDA in Matplotlib and Seaborn to surface length of stay and post-surgical trends that drove feature selection.
- Trained and benchmarked Logistic Regression, Decision Tree, and Random Forest classifiers to predict overstays and adverse surgical outcomes.

Car Reliability & Safety Analysis — Python, scikit-learn

- Cleaned and normalized a multi-year vehicle dataset to analyze part reliability and breakdown frequency.
- Visualized pricing, failure, and safety patterns across vehicle age cohorts using Matplotlib and Seaborn.
- Built scikit-learn models to test whether newer vehicles exhibit lower fatality rates, delivering statistically supported findings.

Real-Time Traffic Prediction Pipeline — Hadoop, Spark ML

- Deployed a Spark cluster ingesting live Austin traffic data through a streaming pipeline.
- Productionized a trained ML model to generate real time traffic predictions for downstream consumers.
- Engineered features and models with PySpark (VectorAssembler, StringIndexer, RandomForestRegressor).

AWS Mini-Architecture — S3, EC2, IAM, Terraform

- Architected a cloud environment using S3, EC2, and IAM for storage, compute, and secure access control.
- Codified the full stack in Terraform for reproducible, automated provisioning.
- Promoted the architecture across test and production, validating configuration parity and data flow.

EXPERIENCE

Data Operations Specialist — Harris County Elections

via A1 Personnel & Open Works • Houston, TX. Sep 2024 – Aug 2025

- Executed high volume data validation and reporting workflows with 100% accuracy across critical election cycles.
- Resolved voter and poll worker inquiries by phone and email, reducing escalations to senior staff and improving response efficiency.
- Partnered on discrepancy resolution, compliance checks, and audit ready reporting that supported county wide election integrity.
- Supported training and real time troubleshooting during election day operations, ensuring smooth system performance under peak load.
- Maintained detailed documentation of data corrections, workflow steps, and system issues to support transparency and post election audits.
- Collaborated with cross functional teams to streamline data intake processes and

reduce manual correction time.

Security Officer & Front Desk Support — *Allied Universal Security*

Houston, TX. Apr 2022 – Apr 2023

- Administered access logs, visitor data, and building records for 200+ employees, ensuring accurate and compliant documentation.
- Monitored digital security systems and coordinated incident reporting with management for compliance and risk mitigation.
- Authored detailed incident and activity reports used for internal audits and safety reviews.
- Provided front desk support, resolving visitor and employee inquiries while maintaining secure facility operations.
- Recognized as Best Employee of the Year, 2022 for reliability, professionalism, and consistent operational accuracy.

Apple Repair Specialist — *CSAT Solutions*

Houston, TX. Aug 2021 – Feb 2022

- Diagnosed and repaired Apple laptops and desktops, including hardware replacements, OS reinstalls, and system resets.
- Managed parts inventory and documented repair workflows to maintain audit-ready records and reduce processing errors.
- Performed quality checks to ensure repaired devices met Apple performance standards before release.
- Collaborated with technicians to troubleshoot complex hardware issues and reduce repeat repair rates.
- Recognized as Best Coordinator of the Year, 2021 for accuracy, speed, and customer-ready documentation.
